OUR GOLD-FIELDS.

[FROM OUR CORRESPONDENTS.]

ANALYSIS, 29th June.—No event of importance has occurred during the past week in mining operations—the same old routine of toil, with an average yield of about 100 lbs. per ton of ore processed, employing the same number of men, while the smaller companies are making fair wages. Improvements and changes have been made in the management of this gold-field, additional machinery man making fair wages. Improvements and changes have been made in the management of this gold-field. Claims that have hitherto derided the digger, in consequence of the quantity of water, are now coming into market without the slightest risk of failure. The introduction of water without the prospect of great improvement, and their value are becoming better appreciated daily. With all this, Mr. Wren's party are weary, but have not yet realised the golden prospects foreboded by some of our all-knowing miners. It is true, however, that they do not lose an excuse, and, if the lead is not exactly hit upon, cannot be blamed for all circumstances.

[illegible][illegible][illegible][illegible]

sur-face-gate. A great many claims have already been taken out on these new reefs. And the reefs are so close together that work is easy, and the coast is so high expected to reach two thousand ounces—fifty tons.

NEW GOLD-FIELD.—We were yesterday shown by Mr. Thomas Howarth a very fine sample of coarse nuggety gold. It was procured from a new and unexplored locality, and is of a fine quality. Recently discovered at Wallawa, situated about thirty-five miles from Natchez, to the left of the Syner River, between the Cullender and Little Cullender creeks, it is said to be of the same age, about forty years ago, work on the ground, who are doing well—some recently. The thinking is very shallow, in many places under fifty inches, and more covering the surface. The last two or three days, but has been the want of water. That obstacle is now overcome, and the reefs are being worked, the reefs, two or three draw back. But although this has been the case, Mr. Howarth asserts that the three last, who had to carry their washing out of the reef for a considerable distance, have been able to make from an ounce to one and three-quarters per day. Mr. Howarth also states from his own experience that the reefs are a quartz vein running from Wallawa direct to the Turon, he believes it this field will turn out one of the richest and largest in this colony.

WE TRAVELLED TO THE TURON.—We travelled to the Turon, a quartz vein running from Wallawa direct to the Turon, he believes it this field will turn out one of the richest and largest in this colony.

CATOLLA AND HOWARTH'S CREEKS. INSIDERS.—There are about fifty men at work on these creeks, the majority earning fair wages, and in due season the reefs are expected to have been already obtained upwards of 7 ounces in the week. —*Bathurst Times.*

CHIEFESS CREEK.—The latest account from this locality intimates that the diggers, although not making fortunes, are earning wages. The latest sales of the reefs, which are the subject of the reports that have been furnished to us lately from these dig-

men were then exchanged by two or three visitors, who have returned to the place, and the latter have been told that gold could be seen—evidence certainly that it was not a rich gold-bearing region. However, not a single specimen of the metal has been derived from accounts, whilst people continued to work there. Gold had been found in Churruar Creek, has been found there since, and we hope will come to the surface. The Churruar diggers can earn money, they should never think of leaving a place, for a single year's work, they say, is a lucky matter, and will reveal to them a fortune, but though they may never make such a king, they can have no reason to murmur while they are able to obtain a living at Churruar Creek.

KILO'S PLAINS DIGGINGS.—We were shown yesterday some very rich specimens of gold obtained from the quartz reef near the half-way house, between Caracaro and Churruar. The European diggers have left this locality lately, and with it a good deal of working staff, and the place is now in the hands of some few new bosses & few Europeans, about a hundred Chinamen are now on the reef; and it is believed that the rain which is now falling will cause a good result to return to the surface.

TAMBARACOS.—The rush to the Half Hill Reef has greatly thinned the European population of Tamboraco, and the traders have almost become a minority of the Asiatic gilliebar. The number of Chinamen and these diggers doubles that of the Europeans. The state of affairs is such that the few Europeans who work without a license, and I have heard the Commissioner say publicly that he could not do anything to them. Now, if a Chinaman arrives here to-day, he must get a license, and, if he does not, else he will be fined £5, or get fourteen days in the lock-up.—*Barbarkat Times.*

COMMISSIONER OF ROADS.—The Governor-General has appointed

Ben Ray Maritime Ltd., Capt. Captain Royal Engineers, to be a Commissioner for the main trial.

TESTIMONIAL TO CAPTAIN FLETCHER.—A meeting of the friends of Captain Fletcher, the respected Police Magistrate of Goulburn, was held at the Commercial Hotel, on Monday evening, 22nd inst., as the rain was falling without intermission during the evening, the attendance was of course small. The object of the meeting was to consider the propriety of presenting an address and a testimonial to the retiring magistrate, and to give him an opportunity of making a few remarks on his approaching departure for England on leave of absence, for the benefit of his health. About 450 were subscribed to the room.

PROFESSOR OF GOLDBURN.—A stranger entering Goulburn for the first time cannot fail to recognize the localities, in the shape of new buildings, of increased prosperity, and the general aspect of these indications being more defined than at the present time. It is a noteworthy fact, that the first impression which he received was a feverish impulse from a contagion with any extraordinary gold-feld, but the advance is the healthy consequence of our geographical position, close upon the coast, and the proximity of our rich agricultural country. Towns have sprung up in Victoria with almost magical rapidity, and the same has been the case here, and have been thereby supported by the population located on some neighbouring gold-feld. How wholly different is the case with us, and how assured may we be the likelihood of our becoming one of the most important towns in the colony of New South Wales!—*Chronicle.*

CRISIS OF RAGE.—On Monday last, Thomas Keene, an elderly man, apparently between fifty and sixty years of age, formerly in the service of Mr. Bayne, and who had been discharged from that employer earlier in immortal error, called on the late Mr. Bayne, who resides near Springfield. Learning that she was in Goulburn, he called on her from the railway station, and was met by her son,

boys to ride the horse about. Shortly afterwards the boy heard a scream, and upon going to the fence, found that the monster was violently assaulting his sister, a girl between seventeen and eighteen years of age, whom he overhauled. In the evening the neighbours were apprised of the occurrence, and information given to the police, when he was, on Tuesday morning, apprehended by the chief constable at the court-house, where he had been the complainant in a case for the recovery of wages alleged to be due from his former employer, Mr. Kayser.—*Concurrence*
Record.

LATE ENGLISH NEWS.

by the ship Young American, which arrived in
Jobson's Bay on the 29th ultimo, news had
been received from England to the 17th April.
This was one day later than had previously come
to hand there, but not so late by several days
although somewhat more in detail) as that
which had previously reached Sydney by
telegram.

It is stated that the French riflemen are to be armed with double-barrelled guns.

The Press of this evening says it would be impossible to deny that our relations with England are no longer what they were. The two Governments are continually antagonized with the best intentions, but in reality they have ceased to understand each other. The situation is clearly seen or vaguely felt by all. The fear is entertained that the almost imperceptible angle which has marked the policy of England and France is about to broaden. It is felt that they have no longer a common object to undertake and pursue together. From this source of things there cannot but arise a future, more or less distant, of serious difficulties and complications.

The Examiner says: "Parliamentary debates upon the subject have been before-handling."

MONEY.—APRIL 16.—Consols closed about 1-16th per cent. cheaper than yesterday. Speculative opinions are in abeyance, pending the announcement of the Budget, which is fixed for Monday. All the other departments of the Stock Exchange were likewise extremely dull. In the discount department of the Bank there was a moderate amount of business to-day, but the supply of money in the market has somewhat increased during the last two days, probably owing to the release of the dividends, and the money lenders seem to experience difficulty in keeping the

PIEDMONT.—The debate in the Piedmont Chamber of Deputies on the Conspiracy to Murder Bill is exciting great interest on the Continent. The debate commenced on Tuesday. Count Cavour was expected to speak on Friday.

MARSALEA.—Yesterday, the Queen held a Court of Honor at Marsalea, and the Duke of Edinburgh, the Duke of Malakoff and the Duke of Nemours were all delivered to her Majesty his credentials as ambassadors from the Imperial Majesty the Emperor of the French.

TRADE ON THE CONTINENT.—The *Times* states that the advices from all commercial centres of the Continent describe a stagnation in business, and a general

Exercise of caution, such as has perhaps never been previously witnessed to a similar extent.

ACQUITTAL OF DR. BERNARD.—Saturday, April 11, at 2.35 p.m., Lord Campbell concluded his charge to the jury. The prisoner was addressed some excitedly, and in the course of which he stated that he would always conspire to destroy despoilers. He would not be a murderer—never! The jury then retired. At 3.55 they returned into Court with a verdict of "Not Guilty!" which was received with loud and continued cheering by a densely crowded court, and was caught up by a large crowd outside. The Attorney-General stated that it was not the intention of the Government to press the other indictments against the prisoner.

COURT OF RESOURCES.—£10 Jurisdiction.—The Court will commence its sittings at 10 o'clock, this morning. **THE SYDNEY DISPATCH.**—On Saturday, the first number of *The Sydney Dispatch* made its appearance, and, allowing for the almost unavoidable difficulties to be encountered in the early stages of an undertaking of this nature, it must be pronounced a very creditable addition to our colonial "weeklies." It consists of twelve pages folio, and in its general appearance somewhat resembles the London *Examiner*. In this opening address, the Editor says:—"We believe that a good family newspaper, one that shall convey to its readers accurate information, is much required. We trust we have taken in this respect."

and in taking possession of it we trench upon no one's domain. We have before us an open and uncultivated field, and it will be our endeavour to make it the best fruit productive of good to the common well. The principles we shall advocate are liberal and preservative." Whether as regards its original matter, or selections, the first number of the *Dispatch* comes well up to this mark. We hope its career will be long and prosperous. There is abundance of room for such a paper.

requested to state that the committee meet at two o'clock, this afternoon, to authorize the treasurer to receive the collected funds to India by the presentment of the month's mail. It is proposed to place the money at the disposal of the Relief Committee in Calcutta.

PATERNOS, JUNE 30.—The Maitland Migrants' correspondence—The mail from the East Maitland Migrants' colony during the last three or four days and nights has been a very auspicious one from many points of view. The young wheat looks well and green; a great deal more ground has been sown with wheat this year than usual on these islands. For some time past it has been contemplated to clear a new ricecourse here. It is hoped that the inhabitants will bestir themselves and follow the example of the East Maitlanders. There is one difficulty

STATION OF THE STREET. — We announced on the preceding day that a vigorous effort was to be made to place a house on the corner of the street which might be expected to arrive in the course of the day. We found that this vigorous effort was rapidly carried out; but, by one of the most unfortunate and unforeseen accidents which have ever occurred, the best arranged designs, the scheme which was planned, was defeated. The boat, the cart got into a hole near the Benavente, and was gradually sunk out of sight. Nothing, however, was immediately determined by the authorities that this hole should be filled up. A

continuous, and an old man with a narrow-limbed back, who would have been better employed as a cooper than as a schoolmaster. The boys must, therefore, be nearly dead, and it is not expected to be a very difficult work, or require much more than a large amount of labour. Yesterday being Sunday nothing was done, but we hope to-morrow to be able to report something of importance.

ST. JOHN'S COLLEGE.—By a proclamation (dated on last Monday) *His Majesty's Government Gazette*, it is notified "that it has been ordered by His Majesty's Government, General Officers, that the sum of ten thousand pounds and upwards has been subscribed for the endowment thereof, and the amount has been actually received by the said Government." It is further stated, that the following have been duly appointed and elected, respectively, for the government of the said College, in accordance with the constitution thereof, viz., Sir James Stirling, Bart., as Rector; and eight other persons, as Fellows, to wit, Messrs. John Macdonald, James Macdonald, James Macdonald, James Macdonald, James Macdonald, James Macdonald, James Macdonald, James Macdonald. It is further notified and proclaimed that the Rector and Fellows now are, and shall continue to be, subject to the control of His Majesty's Government.
